

SlidesGen-Bench: Evaluating Slides Generation via Computational and Quantitative Metrics

Year: 2026 **Source:** docs/REFERENCES.md verified bibliography

Question	One-page summary
What it studies	Evaluates slide generation on content, aesthetics, and editability using visual outputs and preference data.
What slidekit uses	Motivates separating aesthetics from content and keeping editability measurable.
YAML vs HTML implication	HTML is strong for benchmark rendering; YAML is stronger for preserving editability and structured downstream changes.
Executive takeaway	Use research-style HTML/rendered evaluation when pixel fidelity is the object of study; use slidekit YAML when the production goal is auditable, schema-valid, deterministic deck generation.
