

Evaluation Metrics for Automated Typographic Poster Generation

Year: 2024 **Source:** docs/REFERENCES.md verified bibliography

Question	One-page summary
What it studies	Organizes metrics into legibility, aesthetics, and semantics for generated posters.
What slidekit uses	Backs treating contrast and text visibility as deterministic constraints.
YAML vs HTML implication	HTML gives typographic fidelity through CSS; YAML enforces safe font and size policies earlier.
Executive takeaway	Use research-style HTML/rendered evaluation when pixel fidelity is the object of study; use slidekit YAML when the production goal is auditable, schema-valid, deterministic deck generation.
