

Learning Layouts for Single-Page Graphic Designs

Year: 2014 **Source:** docs/REFERENCES.md verified bibliography

Question	One-page summary
What it studies	Uses energy terms for alignment, overlap, whitespace, importance, and balance, with learned weights.
What slidekit uses	Backs geometry-based metrics and suggests learned/non-linear future weights.
YAML vs HTML implication	HTML is useful when learning from visual examples; YAML is useful when applying learned constraints reproducibly.
Executive takeaway	Use research-style HTML/rendered evaluation when pixel fidelity is the object of study; use slidekit YAML when the production goal is auditable, schema-valid, deterministic deck generation.
