

PPTAgent: Generating and Evaluating Presentations Beyond Text-to-Slides

Year: 2025 **Source:** docs/REFERENCES.md verified bibliography

Question	One-page summary
What it studies	Introduces evaluation dimensions for content, design, and coherence in presentation generation.
What slidekit uses	Supports slidekit scoring design separately from deck-level cross-slide consistency.
YAML vs HTML implication	HTML suits holistic visual evaluation; YAML makes cross-slide consistency policies explicit across a deck.
Executive takeaway	Use research-style HTML/rendered evaluation when pixel fidelity is the object of study; use slidekit YAML when the production goal is auditable, schema-valid, deterministic deck generation.
