

Harrington et al.: Aesthetic Measures for Automated Document Layout

Year: 2004 **Source:** docs/REFERENCES.md verified bibliography

Question	One-page summary
What it studies	Proposes heuristic layout measures including alignment, regularity, separation, balance, whitespace, proportion, and uniformity, combined non-linearly.
What slidekit uses	Supports slidekit metrics and future non-linear score composition.
YAML vs HTML implication	HTML can render arbitrary documents; YAML encourages constrained, measurable documents where one severe defect can be caught before rendering.
Executive takeaway	Use research-style HTML/rendered evaluation when pixel fidelity is the object of study; use slidekit YAML when the production goal is auditable, schema-valid, deterministic deck generation.
